

SUPAlyx Garlic

FOR CATTLE AND SHEEP

A high specification garlic enriched mineralvitamin lick for cattle and sheep on grazing or high forage systems. Supports performance, health and fertility and helps discourage nuisance insects.

FEATURES & BENEFITS:

- The inclusion of garlic acts as a natural means of helping to discourage flies and biting insects, which may otherwise cause stress, grazing disturbance and irritation to stock, resulting in potential reduced performance and health.
- Fortified with minerals, trace elements and vitamins, including a protected source of zinc, to support good stock health and complement forages.
- Contains added vitamin B1 and B12.
- Convenient: available in 22.5kg and 80kg to suit your system.

IDEAL FOR:

- All classes of cattle and sheep during warmer months when insect populations are most active.

USER GUIDE:

- We recommend offering one 22.5kg bucket per 15 cattle or 35 sheep, or one 80kg bucket per 50 cattle or 90 sheep.

Do not feed to dairy cows or heifers within 7 days of calving due to the risk of milk taint. Product should be withdrawn 7 days before parturition where milk is intended for human consumption. For meat-producing animals, withdraw product 21 days prior to slaughter.

AVAILABLE WITH ADDED COPPER

Product Specification:

Typical sugar	23,0%
Calcium	12,5%
Phosphorus	0,5%
Magnesium	3,5%
Sodium	6,0%
