

Hand-operated back powder spreader

"The real solution is always close to nature."

Where to use:

Where noise-free operation is important e.g. broiler, goose, duck, turkey production and parent farms, ruminants, stables, calf cages, calving room, lambing room etc.

Places with a high stocking density.

Where directed spreading is important e.g. nests, under drinkers, reception, calf cage etc.

Resting box for dairy cows.

At corners, under and around objects, racks, cages, nests etc.

For the prevention of lameness, spraying directly on the feet.

For treatment against parasites.

ADVANTAGES	SPECIFICATIONS
Precise, adjustable dosing	TANK CAPACITY: 9l
Minimum self-weight	WEIGHT: 3kg
