

Petrol-powered back powder spreader

Where to use:

For efficient spraying of large barns, eg. for poultry, beef cattle, dairy cattle, sheep etc. (deep litter, growing litter), caged livestock etc.

In places with a high stocking density where it is already difficult to move among animals and engine noise is not a problem.

For tight, hard-to-reach places e.g. at corners, under objects, around racks, nests etc.

For treatment against parasites where engine noise is not a problem.

ADVANTAGES	SPECIFICATIONS
A large area can be sprayed in a short time (1000 nm - in 4 minutes)	ENGINE: Two-stroke 42cm3 petrol
Adjustable spread rate	TANK SIZE: 14l
Small space for operation and storage	POWDER TRANSPORT: 6kg / min
Easy to use	HORIZONTAL SPREADING DISTANCE: 8-10m
Minimum maintenance required	NOISE LEVEL: > 80 DB
Good value for money	PERSONAL PROTECTION: Ear protection and dust mask are recommended
